A talented and experienced front-end developer with a year of pragmatic experience. Contributing to a highly collaborative work environment and finding solutions. Building pixel-perfect designs, writing clean codes and creating exceptional web experiences are my passions.

PROFESSIONAL EXPERIENCE

VastFluid Finance

Mar 2023 – May 2023

Post: Front-end Developer

Achievements:

- Collaborated with the design team to create an intuitive and user-friendly front-end for a Dapp.
- Developed a fully responsive landing page for VastFluid's website.

DEFT Trader

Jan 2023 – Feb 2023

Post: Front-end Developer (Freelance)

Achievements:

- Designed & developed a fully responsive multi-page Forex website, providing a seamless user experience across multiple devices & screens.
- Implemented functional authentication, an admin panel, and a database using Firebase, ensuring secure access and efficient data management.
- Utilized REST API integration to fetch real-time data from myfxbook, enhancing the website's functionality and providing users with up-to-date information.

StableDoc

Oct 2021 – Dec 2022

Post: Strategy and Quality Assurance

Achievements:

- Led a team of 2 designers and 6 developers to launch a DApp, 3 Mobile Applications and 2 Web Applications.
- Conducted 20,000+ lines of code evaluation to make sure that industry best practices are followed, boosting product optimization by 20% and making the code base 100% developer-friendly.
- Submitted code evaluation report that helps the firm make better and informed decision and in turn increase productivity by 30%.
- Recommended good quality designs used in building 5 products that are 90% effective.
- Managed the ecosystem community platform and 8 other community managers.
